## QUICK-LOCK (QLF®) COMPLIANT

### QMA and QN CONNECTORS AND CABLE ASSEMBLIES

Pasternack introduces our new line of QMA and QN connectors and cable assemblies. Compliant to QLF® specifications, the connectors provide fast, easy and secure matings with minimal space requirements. (Quick Lock Formula® and the QLF® logo are registered trademarks of Huber+Suhner AG and Radiall SA.)

**QMA Connectors are snap-on versions of SMA Connectors.** Designed for DC to 18 GHz, these connectors can mount in a few seconds. No torque wrench is needed, making them excellent for field applications. Connectors can be spaced closer together for this same reason. The cabled connector plug can rotate freely 360° around the jack, easing installation again while reducing stress on the cable and any return loss due to bending.

## Pasternack introduces its new line of LFU Connectors and Cable Assemblies

Compatible with Hirose U.FL™ connectors, these connectors and cable assemblies are typically used in mobile phone, radio communication, measurement, GPS, wireless LAN and Bluetooth applications.

Pasternack's LFU Connectors offer an extremely small footprint and low profile, making them one of the world's smallest and lightest coaxial connectors. Pasternack offers both pigtail and complete cable assemblies that come with standard terminations of SMA, MCX, and TNC, or can be terminated with other standard Coaxial connectors upon request. Our cables are especially helpful for testing PC boards that utilize the Surface Mount Pasternack LFU and Hirose U.FL™ series connectors. The cable assemblies utilize 1.13mm coax or RG178B/U coaxial cable. A Tactile locking mechanism allows mating connectors to snap into place. These ultra-miniature connectors provide operation up to 6GHz at 50 Ohms.

## TEST & MEASUREMENT CALIBRATION KITS

Your VNA provides you with the most accurate measurements only if calibrated against known standards. Pasternack VNA Calibration Kits and Tools incorporate accurate, stable, and precise calibration standards designed for a broad range of vector network analyzers models, including Agilent and Anritsu!

### PE5500-KIT 3.5mm Standard VNA Calibration Kit

With this kit you can make error-corrected measurements of devices supplied with either 3.5mm or SMA connectors from DC to 26.5 GHz. This kit contains both Male (Plug) and Female (Jack) connector interfaces to perform full Two-Port error corrections. This yields the most complete calibration because it accounts for the three major sources of systematic error addressed by one-port calibration at both ports of a two-port DUT. The short, open, load, and thru standards make up the calibration kit. The most common thru used is the test ports connected directly together.

## NEW QUICK-DISCONNECT QD-SMA CABLE ASSEMBLIES

Pasternack's Quick-Disconnect Cable Assemblies are designed for Test environments that require rapid SMA connections. The QD-SMA is designed to push on and lock in place by sliding the shroud over the connector. Where enhanced VSWR measurements are required, an additional 1/8 turn of the QD-SMA will ensure lower VSWR performance. The QD-SMA Connector can be quickly removed by pulling on the shroud and sliding off the QD-SMA connector.

# LMR<sup>®</sup> EQUIVALENT CABLE ASSEMBLIES

The Pasternack Wireless Data jumper series is ideal where PIM (Passive Intermodulation Distortion) is a concern, such as WiFi or GSM base station applications. The connectors are low PIM designs and the coax has a lightweight, low-loss construction. The cables are fully interchangeable with standard 7/16 DIN jumpers.

# LMR<sup>®</sup> EQUIVALENT CABLE ASSEMBLIES

The Pasternack Wireless Data jumper series is ideal where PIM (Passive Intermodulation Distortion) is a concern, such as WiFi or GSM base station applications. The connectors are low PIM designs and the coax has a lightweight, low-loss construction. The cables are fully interchangeable with standard Type N jumpers.

# HIGH DEFINITION (HD) CABLE ASSEMBLIES

The HD Precision 75 Ohm cable assemblies are recommended for demanding applications where signal integrity is critical. The assemblies are designed around Pasternack's new PE-BYR940 Mini-59 coax cable, which provides improved impedance and phase stability over standard RG type assemblies. Typical applications include HDTV, satellite communications, and digital broadcast.

## NOTES

# HIGH DEFINITION (HD) CONNECTORS

SEE PAGE 266 FOR MOUNTING HOLES

The new HD series is a professional-grade, 75 Ohm connector line designed for applications that include HDTV, satellite communications, and digital broadcast. The HD series connectors are designed around the popular Mini-59 type coaxial cables, such as Pasternack's new PE-BYR940. The HD Precision connectors are designed specifically for Pasternack's PE-BYR940 and Belden's 1855A cables, while the HD Universal connectors are designed for generic 75 Ohm cables with a 23, 24 or 25 AWG center conductor.

# PASTERNAK ENTERPRISES ROHS COMPLIANCE PROGRAM

## What is RoHS Compliance?

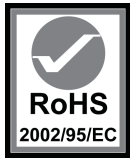

The European Union set forth the RoHS (Restriction of Hazardous Substances) Directive to establish environmental guidelines and legislation to reduce the presence of six (6) materials deemed hazardous to the environment. To comply, products entering the EU must not have a homogeneous presence of these materials above the following levels by weight percentage:

- Lead (Pb) < 0.1%
- Mercury (Hg) < 0.1%
- Cadmium (Cd) < 0.01%
- Hexavalent Chromium (CrVI) < 0.1%
- Polybrominated Biphenyls (PBB) < 0.1%
- Polybrominated Diphenyl Esters (PBDE) < 0.1%

At Pasternack we recognize our responsibility as a supplier of coax connectors, cable assemblies, and components potentially used within electronic-based systems and products that are targeted for RoHS compliance. We are fully committed to offering RoHS compliance on the greatest majority of our products. We have completed a comprehensive evaluation and analysis program both internally and with our suppliers to establish and publish RoHS compliant statements for our products on our website.

## Determining Pasternack RoHS Compliance

To determine if the product in our catalog is RoHS Compliant, please first refer to our website at [www.Pasternack.com](http://www.Pasternack.com). For each part we have supplied an indicator of compliance using this symbol:

All products displaying this symbol on our website have been certified as RoHS Compliant. Click on this symbol to view the Certificate of RoHS Compliance for this product.

We recognize that you may have specific questions regarding RoHS certification on Pasternack's components and products. We will be happy to process all such requests and provide individual product RoHS information as quickly as possible. Please direct any such requests to Pasternack Enterprises Technical Support via email at [TechSupport@Pasternack.com](mailto:TechSupport@Pasternack.com) or by calling Toll-Free within North America at 1-866-PASTERNAK (866-727-8376). International customers please use +1-949-261-1920.

## Methods Determining RoHS Compliance

RoHS Compliance is determined by a combination of supplier certification and engineering design verification. In most cases, Pasternack's products were determined to be RoHS Compliant. In many cases the Compliance was through a stated Exemption to the RoHS Directive. As a supplier of coaxial connectors, adapters, and RF components, Pasternack uses materials such as Brass and Stainless Steel which contain lead as a percentage of weight above the 0.1% threshold, but are allowed through the Exemptions as of the October 21<sup>st</sup>, 2005 RoHS Directive amendment. Pasternack uses these Exemptions to the RoHS Directive where applicable.

## What are the Exemptions?

*RoHS Directive text as of the Oct 21<sup>st</sup>, 2005 amendment is underlined, and how it applies to Pasternack products is indicated below each Exemption.*

### ANNEX to ROHS DIRECTIVE 2002/95/EC

**"Applications of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) which are exempted from the requirements of Article 4(1)":**

5. Lead in glass of cathode ray tubes, electronic components and fluorescent tubes.  
Some Pasternack products use resistive and/or dielectric inks that contain lead in a glass phase and fall under this exemption 5.
6. Lead as an alloying element in steel containing up to 0.35% lead by weight, aluminum containing up to 0.4% lead by weight and as a copper alloy containing up to 4% lead by weight.  
Most Pasternack products use metal alloys that contain lead below the maximum concentration values specified under this exemption 6. Specifically: aluminum alloys, brass, stainless steel, beryllium copper & phosphor bronze.
7. Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signaling, transmission as well as network management for telecommunications.

All Pasternack coaxial cable assemblies are made using solder containing lead (unless lead-free solder is specified), and may be used in network infrastructure equipment and therefore would fall under this exemption 7. This exemption is application specific, however, and we therefore leave it up to our customer to determine whether this exemption applies to their application.

**Lead-free solder is now available for all cable assemblies upon request or online at [www.Pasternack.com](http://www.Pasternack.com).**

Pasternack has loaded new part numbers for cable assemblies using lead-free solder on our website, using the format PE3xxxxLF-yy, where "xxxx" identifies the part using the existing corresponding item number, and "yy" identifies the length in inches. For example, PE3067LF-24 is the same as PE3067-24 (BNC Male to BNC Male, RG58C/U), except it uses lead-free solder to be fully ROHS Compliant.

If Customer fails to make payment when due, Pasternack may pursue any legal or equitable remedies, in which event Pasternack will be entitled to reimbursement for costs of collection and reasonable attorneys' fees.
